NOTICE OF PUBLIC HEARING

concerning

**RENEWAL OF WASTE DISCHARGE REQUIREMENTS
(NPDES PERMIT NO. CA0078891)**

FOR THE

CITY OF RED BLUFF

RED BLUFF WASTEWATER RECLAMATION PLANT

TEHAMA COUNTY

The City of Red Bluff (Discharger) owns the Red Bluff Wastewater Reclamation Plant (Facility) and discharges up to 2.5 million gallons per day (average dry weather flow) of treated wastewater into the Sacramento River, a water of the United States. The Facility is contract-operated by Inframark Water Infrastructure Operations. The treatment system consists of influent screening, aerated grit removal, primary sedimentation, activated sludge treatment, secondary clarification, filtration, chlorine disinfection, and dechlorination with sodium bisulfite. Treated effluent is discharged to the Sacramento River through a 30-inch-diameter open-ended concrete coated steel pipe. Aerobically digested waste sludge and raw sludge is pumped into one of three storage basins, dried onsite via solar radiation/evaporation, and the resulting biosolids are hauled to the Tehama County and City of Red Bluff Class III Municipal Solid Waste Landfill for final disposal. The discharge of wastewater from the Facility is regulated under existing Waste Discharge Requirements (WDRs) Order R5-2013-0044, National Pollutant Discharge Elimination System (NPDES) permit No. CA0078891. The Discharger submitted a Report of Waste Discharge and requested renewal of the existing NPDES permit. Staff recommends the Central Valley Water Board adopt the tentative NPDES permit to regulate discharge from the Facility.
